### Notes on Age Grading

Age grading attempts to compare runners of different genders, ages using a percentage rating. A score of 100% is deemed to be 'World Record' level.

It does this by using factors/allowances for a given distance based on an athletes age and gender.

Distance for Royton Trail is deemed to be 5.5 miles, if it longer than this then your age graded % will increase. Similarly if it shorter it will decrease.

Assuming the race distance is correct, then age grading figures on a 'road' course of a similar profile would almost certainly be higher.
